

ACKNOWLEDGEMENTS

We are very grateful to several of our APNME senior members for their continuous support of the compilation and publication of this book. First and foremost, we sincerely thank the reviewers of the chapters: Jiyoung Choi, Kristjansson Kristjan, Maosen Li, Monica Taylor, Wiel Veugelers, Chih-Hung Wang, Meiyee Wong, and Meiyao Wu. Moreover, we greatly appreciate our English editors, John Palmer and Frank W. Stevenson, who improved the quality and clarity of every author's English writing. In addition, the hard work of our two editorial assistants, Shih-Hung Chuang and Hsiao-Hsuan Fan, in conscientiously and carefully typesetting and proofreading the text will never be forgotten. The designer of our book cover, Yi Ou Yang, created a very warm and cozy image for the book. A member of the APNME advisory board, Christopher Drake, helped to check and confirm the copyright format and addressed other relevant publication issues, and Wai-Chan Mandy Chan helped us deal with other technical matters. Finally, we greatly appreciate all the authors, as well as the APNME committee and other members of the organization, for their great support in making possible the publication of this book. We do hope that in the future more of our members can become involved in and contribute to our APNME publications.
